CLEANING INSTRUCTIONS

Shedding is a normal occurrence and will reduce over time with frequent vacuuming. Vacuuming the rug several times when it is first unrolled will remove much of the extra fiber. Do not pull loose ends; clip them with scissors to remove. Turn carpet periodically to equalize wear. Vacuum regularly, and remove spills immediately; if liquid blot with clean undyed cloth by pressing firmly around the spill to absorb as much as possible, for hard to remove stains, professional rug cleaning is recommended. Use of a rug pad is recommended.
