

# WHAT IS LAMONTAGE®

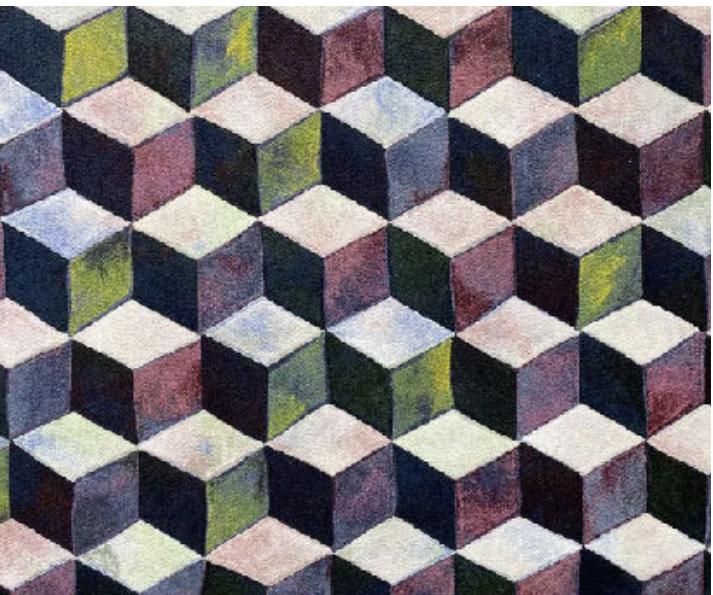

Liora Manné's patented Lamontage® process changes the way we interact and perceive textiles. Free from the limitations of traditional woven, knitted, and printed textiles, the Lamontage® process creates high-performance textiles suitable for wall covering, rugs, accent ceilings, and upholstery fabric.

## THE FACTS

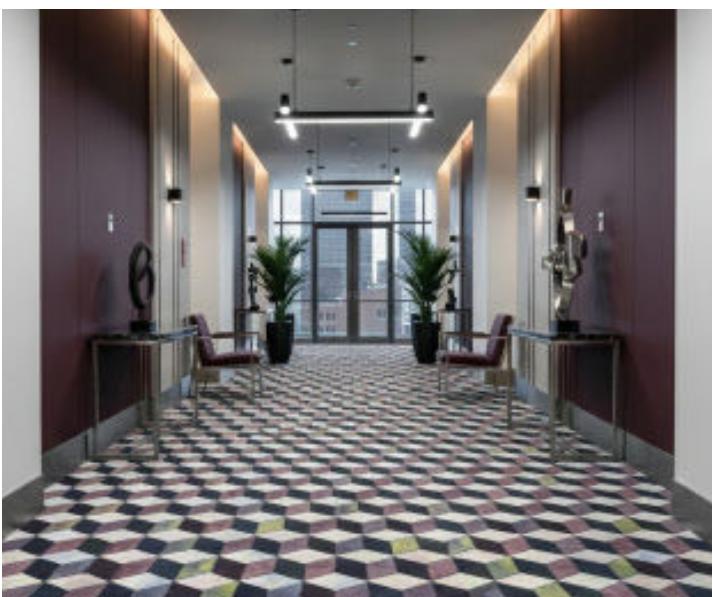

- Stain-resistant
- UV-stabilized
- Bleach-cleanable
- Antimicrobial
  - SmartSilver™ Nano Finish (can be excluded)
- Class A Fire Rated

## THE PROCESS

### DESIGN

Our design studio provides CADs and strike-offs for any customization prior to order placement.

### CUSTOMIZATION

Fully customizable - including design, color, shape - at no additional charge

### SIZE

Up to 13' 6" in width for seamless installation

### COLOR

We match pantones, paint chips or fabric swatches

### ADDITIONS

Metallic fibers, jute, yarn, channels and black light reactive fibers available

# FAQS

## LEAD TIMES

60-75 days via air freight

90-120 days via ocean freight

## MINIMUMS

24 square feet per order

## TRIMMING

Can be trimmed on site - will not unravel or fray

## CLEANING

Regular vacuuming to remove dust and debris.

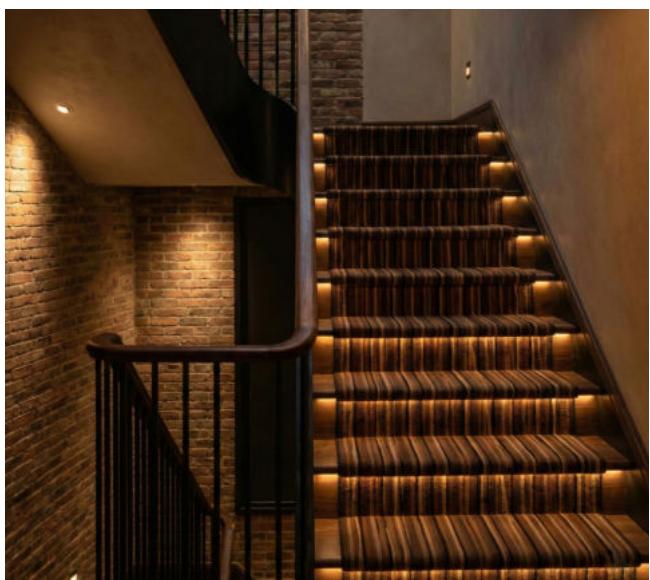

Utilize spot cleaning to address stains as they occur.

For a deeper clean, consider a hot water extraction.

Bleach-cleanable with a 1:4 bleach-water solution.

irregular stripes driftwood upholstery

irregular stripes brown stair runner

irregular stripes black accent wall and ceiling covering

## SUSTAINABILITY

*Liora Manné's commitment to sustainability  
has been a long-standing priority.*

Driven to create environmentally-friendly products, Liora Manné's REvolution Collection utilizes a circular production process, making all (RE) patterns 100% recycled, and all (RE)\* patterns 70% or higher recycled. The fibers are sourced from recycled plastic bottles. The REvolution greyscale is created from varying blends of white and charcoal fibers. (RE)\* patterns include non-recycled elements, such as metallic, yarn, jute, or colored fibers, which reduce the recycled percentage accordingly. All Lamontage® rugs are backed with 100% recycled fibers, making them at least 65% recycled.

The latest introduction of Astrid incorporates recycled apparel, balancing material innovation with the signature artistry and durability of Lamontage®. All Astrid colorways include 30% recycled apparel.
